DOCKET FILE COPY ORIGINAL

Jim Rezowalli (jim@greatgeophysics.com) writes:

I urge you not to regulate ground penetrating radars and other wide band geophysical devices (ET Docket 98-153). I have been a user of these devices for over 15 years. I have used them at airports, military bases, manufacturing facilities and even radio stations. Never have they interfered with other broadcasts. There is no demonstrated reason to restrict thier use.

Requiring licenses will restrict trade and drive up the cost of doing buisness.
